# 1 APSPlatformService

This is a trivial little service that just returns meta data about the specific platform installation.

The returned information is configured in the */apsadminweb*.

## 1.1 APIs

---

```
public class PlatformDescription [se.natusoft.osgi.aps.api.core.platform.model] {
```

*This model provides information about a platform installation.*

```
public PlatformDescription()
```

*Creates a new PlatformDescription.*

```
