# 1 APSUserAdminWeb

APSUserAdminWeb provides user and group administration for the *APSSimpleUserService*.

Users are split into groups of the first character in the userid to make them a little bit easier to find if there are many. So all userids starting with 'a' or 'A' will be under Users/A and so on.

Right click on the *Users* node to create a new user.

Right click on the *Roles* node to create a new role.

**Warning:** For the roles it is fully possible to create circular dependencies! **Dont!** (There is room for improvement on this point!)

There is not anything more to say about this. It should be selfexplanatory!
